

Fork

Model Fork Large

Just like when you turn on a lamp inside a camping tent, the light inside the diffuser highlights the patchwork structure and enhances the texture of the canvas with visible stitching as in jeans.

The linen cotton diffuser, available in ivory and gray, creates a warm and soft lighting effect. 360° adjustable thanks to the gunmetal colored brass eyelets in strong material contrast with the softness of the fabric, the diffuser allows the light beam to be directed at will.
