

DoubleZero7

Track System, *design by* Lodes

Model Suspended UP&DOWN Profile

DoubleZero7 is an open and reconfigurable system that brings together the different languages of light – architectural, decorative and functional – combining lighting precision, compositional freedom and aesthetic value within a single, coherent vision. *DoubleZero7* is Lodes' first opentrack system.

A lighting infrastructure designed not only to accommodate dedicated architectural lighting modules, but also to be compatible with all the suspension lights in the catalogue. The track runs through the space like a graphic line, creating fluid and consistent scenarios in which technical function becomes part of the decorative gesture, naturally adapting to every type of setting – from residential to hospitality, from retail to contract environments.
